Supply Contracts at SkiRetail (Answers)

Navneet Vidyarthi

| Q. I | • | Optimal production quantity = 15,000 | | | | | | | | |
|------|---|--|---|----------------|----------------|-------------------------|-------------------|-------------------|--|--|
| | | Expected profit for "the company" = \$1,122,813 | | | | | | | | |
| Q. 2 | • | What is your estimate of the quantity for ski jackets that Bergard (SkiRetail) shall | | | | | | | | |
| | | place an order for? | | | | | | | | |
| | | | - | ntity = 10,000 | <mark>)</mark> | | | | | |
| | Expected profit for SkiRetail based on your estimate of order quantity. | | | | | | | | | |
| | | ○ Using empirical method = \$452,500 | | | | | | | | |
| | • | Expected profit for Skiekz based on estimate of order quantity. | | | | | | | | |
| | | Using empirical method = \$530,000 | | | | | | | | |
| | • | Total supply chain profit | | | | | | | | |
| | | ○ Using empirical method = \$982,500 | | | | | | | | |
| | • | How does this profit compare to the vertically integrated case (Q I). As expected, the profit is lower by \$1,122,813 -\$982,500 = 140,313. | | | | | | | | |
| | | | This is a decrease of 12.5% compared to the vertically integrated case. | | | | | | | |
| | | | | | | | / ··· | | | |
| Q 3 | Analyze the impact of different buy-back prices on the optimal order quality. | | | | | | | | | |
| | | retailer's expected profit, supplier's expected profit, as well as the total supply | | | | | | | | |
| | | chain profit? Show your results using some plots. | | | | | | | | |
| | | | back price | | | Retailer's Expe | | | | |
| | | \$ | - | 20.00% | 9000 | \$450,000 | \$470,000 | \$920,000 | | |

| | • | | | | <u> </u> | | | | | |
| | - | | | | | | | | | |

| | • | What is the "optimal" range of buy-back price that you would propose to the firms? | | | | | | | | | |
|-----|--|--|------------------|----------------|--------------------|-------------|-----------------|-----------|--------------|-------------|--|
| | | The optimal, range implies the "profit maximizing" buy-back price, which is | | | | | | | | | |
| | | \$116.67 to \$ 143.33. The total profit is \$1,023, 438. | | | | | | | | | |
| | • | Determine the expected profit for the "retailer" under the proposed buy-back contract. | | | | | | | | | |
| | | The expected profit of the retailer ranges from \$479,170 to \$503,330. | | | | | | | | | |
| | • | Determine the expected profit for the "supplier" under the proposed buy-back contract. | | | | | | | | | |
| | | The expec | cted profit of | the supplier (| <mark>or ma</mark> | nufactur | er) ı | anges fro | m \$544,268 | to | |
| | \$520, I | <mark>07.</mark> | | | | | | _ | | | |
| Q 4 | • What is the optimal purchase /wholesale price that Skiekz should propose? The range of optimal purchase /wholesale price that Skiekz is [122,131]. The maximum profit is \$1,122,813. | | | | | | | | | | |
| | | | | | | | | | | | |
| | • | Determine sharing co | ailer" un | nder | the prop | osed revenu | ie- | | | | |
| | Refer to the table below: | | | | | | | | | | |
| | Determine the expected profit for the "supplier" under the proposed revenue- | | | | | | | | | | |
| | sharing contract. | | | | | | | | | | |
| | Refer to the table below: | | | | | | | | | | |
| | Retailer's | | | | | | | | | $\neg \mid$ | |
| | w | holesale price | Service Level | Optimal Qty. | Expected Profit | | Manuf.'s Profit | | Total Profit | | |
| | \$ | 122.00 | 59.34% | 15000 | \$ | 990,547 | \$ | 132,266 | \$ 1,122,813 | | |
| | \$ | 131.00 | 53.44% | 15000 | \$ | 855,547 | \$ | 267,266 | \$ 1,122,813 | | |
| Q 5 | Re | evenue Sharing is out of scope of this course. Please ignore this question. | | | | | | | | | |
